**PHILOSOPHY:**

I have been practicing podiatric medicine since 1978. My profession has allowed me the opportunity to treat thousands of patients of all ages. I have volunteered my services to many patients who are without health insurance which included migrant workers, churches, schools, athletes, health fairs, and community lectures. I am published and have patented surgical instruments. I desire to become more involved in research and teaching podiatric medicine to other health professionals. I feel that everyone should have access to quality foot health care and I am working towards enhancing the profession of Podiatry.
